

Extra Credit for Spring Semester

Project is worth 30 points. These can be added to your tests, labs, or homework.

Pick a topic in Biology that you would like to study in depth. You will need to include aspects of Science, Math, English, Art and Social Studies in your presentation.

Methods of presentations:

- paper
- poster
- book
- movie
- power point
- game
- model
- dance
- rap/song/poetry

You must include at least 3 different methods to present your information. You need to put different information on the different types of presentations.

EXAMPLE:

Topic - stem cell research

1. **Write a book about the history of stem cell research.**
 - a. **this takes care of both the English (writing book) and Social Studies (history)**
2. **Find data about stem cell research. Put the information on a beautiful poster.**
 - a. **this takes care of Math (data) and Art (beautiful poster)**
3. **You can then make a movie including the scientific information about how stem cell research**

Check with Ms. Tschudy for help with figuring out how to apply the different subjects to your topic.

Make sure you include ample information.
